

# ENVIRONMENTAL POLICY

This environmental policy covers activities on all KAMMAC sites, along with activities on 'client' sites around the UK & Ireland. This policy will be reviewed on an annual basis as part of our ongoing commitment to the environment.

## **Commitment:**

KAMMAC is committed to protecting the environment. We will endeavour to continually improve our environmental performance and carry out all actions in line with requirements.

## **Aims:**

- We will ensure that we adhere to all relevant environmental legislation.
- We will install systems that enhance our practices promoting care for the environment.
- We will review this policy and communicate it internally and externally at appropriate intervals.
- We will aim for zero environmental accidents at each of our operating locations.

## **Objectives:**

- Comply with all developing national and international environmental regulations ensuring compliance.
- Manage activities in such a way as to reduce environmental impact to a practicable minimum.
- Commit ourselves to a continual improvement programme where economically feasible.
- Try and minimise the use of non-renewable raw materials where possible.
- Consider the environmental performance of suppliers and contractors.
- Encourage all process owners within the business to thrive towards zero land fill.
- Invest in recycling mechanisms in order to achieve point above.
- Identify and implement office waste recycling.
- Ensure that all fleet vehicles are fuel efficient and of the lowest carbon emission possible.
- Ensure that this policy is understood, implemented and maintained at all levels within the company.

**Emissions reduction targets** - In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

2023-2024: Provision of Eco-Driver training to fleet drivers to reduce fleet emissions (10% reduction on fleet emissions).

2023-2025: LED retrofit project on all KAMMAC sites to be completed.

2023-2027: Consider operating 5% of the transport fleet on HVO (Hydrogenated Vegetable Oil) and 5-10% reduction year on year there after
